This is to notify you that basIColor GmbH has changed its public profiles licenses to the OSI compatible libz/libpng licenses. This means that the L-Star profile as well as the default CMYK profiles, which can be found on www.colormangement.org, can be distributed with a Debian accepted license.

The license now reads for L-Star RGB:

Open Source Initiative OSI - The zlib/libpng License:Licensing
[OSI Approved License]
The zlib/libpng License

Copyright (c) 2007, basIColor GmbH

This software is provided 'as-is', without any express or implied warranty. In no event will the authors be held liable for any damages arising from the use of this software.

Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the following restrictions:

1. The origin of this software must not be misrepresented; you must not claim that you wrote the original software. If you use this software in a product, an acknowledgment in the product documentation would be appreciated but is not required.
2. Altered source versions must be plainly marked as such, and must not be misrepresented as being the original software.
3. This notice may not be removed or altered from any source distribution.

... for the standard CMYK profiles:

Open Source Initiative OSI - The zlib/libpng License:Licensing
[OSI Approved License]
The zlib/libpng License

Copyright (c) 2007-2010, basIColor GmbH

This software is provided 'as-is', without any express or implied warranty. In no event will the authors be held liable for any damages arising from the use of this software.
